II. Mining and Reclamation

1. Was the mine active during the past year? Yes ☐ No ☒
2. If active, how much ore or mineral was mined? _____
3. How much **additional acreage** was disturbed during the past year? none
4. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, and volume of material moved.

The former Chevron fertilizer production facility was demolished in 1995. This activity did not involve mining activity or disturbance of new areas.

5. How much acreage was **reclaimed** during the past year? none
6. Briefly describe the reclamation work performed during the past year. This description should include methods employed and an evaluation of the results.
No reclamation was performed during 1995.

7. What is the **total disturbed acreage** at years end? 2977 acres by prior owners

8. Briefly summarize any mining and/or reclamation plans for the upcoming year.
No reclamation is planned for 1996. After all the permits and other approvals for the North Impoundment construction are obtained, site preparation will commence. Activities scheduled for 1996 within the permit boundary include construction of the toe ditch, placement of a portion of the blanket drain, and possibly, in December, stockpiling of the coarse fraction of cycloned tailings. The stockpiled tailings will be used for embankment construction in later phases of site preparation.

NOTE: Section III. "Additional Information" applies only to large mining operations.

III. Additional Information

1. An updated surface facilities map should be attached if there have been significant changes since previous map was submitted.
2. Any monitoring results or other reports that are required under the terms of the approved notice of intention should also be attached.
